BAV-3 Positive Control

Product No.: 1506739

(For Research Use Only)

■ Product description

SHENTEK® BAV-3 Positive Control is intended for use with SHENTEK® Virus DNA & RNA Extraction and Detection Kits, and serves as a positive control to monitor the entire process of BAV-3 DNA extraction and PCR detection assay.

■ Kit contents and storage

Reagent	Quantity	Storage
BAV-3 Positive Control	100 µL × 3 tubes	below -65°C

BAV-3 Positive Control can be stored at appropriate conditions for up to 12 months. Please check the expiration date on the labels.

■ Attentions

1. Thaw one tube completely at 2-8°C or on ice, then vortex thoroughly and centrifuge briefly.
2. Follow the preparation process for the Positive Control Sample (PCS) as outlined in the user guide of SHENTEK® BAV-3 Detection Kit or SHENTEK® Bovine Virus Detection Kit (BVDV/REO-3/PI-3/BPV-3/BAV-3).
3. This product is ready for direct use without dilution.
4. Equilibrated to room temperature before use, and avoid repeated freeze-thaw cycles.
5. Do not mix reagents from different batches.
6. This product is intended for research use only and is not used for clinical diagnosis or treatment.
7. This product is an inactivated replication-defective pseudovirus, which is safe, but it is still recommended to operate it in a biosafety cabinet. Experimental waste generated during its use should be sterilized via autoclaving and disposed of in compliance with medical waste regulations.
